PROFILE

Full-stack engineer with 7+ years of shipping production web platforms, business systems and desktop apps for companies in the USA, UAE, Saudi Arabia, Germany and Syria. I work across the stack — React, Vue and TypeScript front ends; PHP/Laravel, Node.js and Python back ends; MySQL and PostgreSQL — and take features from Figma to deployment. I use AI coding tools daily with tests and code review, and integrate LLMs (OpenAI, Gemini, Claude) into products.

SKILLS

Frontend	JavaScript, TypeScript, React, Next.js, Vue.js, Angular, Astro, Tailwind CSS, HTML5/CSS3, Arabic RTL & i18n
Backend	PHP 8, Laravel, Node.js, Express, NestJS, Fastify, Python, FastAPI, REST APIs, WebSockets
Data	MySQL/MariaDB, PostgreSQL, SQLite, MongoDB, Redis, Prisma, Drizzle, Sequelize, TypeORM
AI	OpenAI, Gemini and Claude APIs, RAG (ChromaDB), agent pipelines with review gates, Claude Code
DevOps	Linux, nginx, systemd, Docker, GitLab CI, GitHub Actions, AWS, DigitalOcean, Vercel
Design	Figma, UI/UX design, design systems, Adobe XD, Photoshop, Illustrator
Desktop & mobile	Electron, Expo (React Native)

EXPERIENCE

Full Stack Engineer · Growger — Dalelo classifieds marketplace · hybrid — Sep 2026 – Present

- Engineer on Dalelo, an Arabic-first classifieds marketplace for real estate, vehicles, services and hotels, on the web and in iOS/Android apps, with tens of thousands of listings.
- Ran a security pass across admin, API and payment code: fixed SQL injection, IDOR, CSRF, privilege-escalation and client-controlled payment amount issues.
- Built mobile-app API endpoints (home feed, search on map, reels, saved-search alerts, account media) with rate limiting and an abuse blacklist.
- Reduced Google Maps cost exposure with caching, Places session tokens, throttled geocoding and bot blocking; designed a structured Areas location model.
- Shipped the site-wide redesign in eight QA-verified stages, with dark mode and RTL, English and Turkish passes.

PHP (Flynax), Smarty, MySQL, JavaScript, Google Maps Platform

Full Stack Software Engineer · ShrubHub — Remote · USA — Oct 2023 – Sep 2026

- Built and maintained full-stack features for ShrubHub, an online 3D landscape design and e-commerce platform, and its sister brands MonetizerEngine, Monetize Talks and Justice Guys.
- React front ends and Node.js/REST services; PHP platform modules for the shop, design orders and proposals, and customer, designer and installer portals.
- AI automation: voice-based AI call automation and email automation with the OpenAI and Gmail APIs.
- Delivered 30+ fast, SEO-ready websites for US local businesses through MonetizerEngine (React, Vite, Tailwind, GitHub-based deploys, Search Console).

React, Node.js, PHP, MySQL, OpenAI API, Gmail API

Full Stack Engineer & Product Architect · Proitx — UAE Sep 2020 – Sep 2023

- Led the UX redesign in Figma and the full-stack rebuild of Smart Lab, a desktop laboratory information system: Vue 2 + Electron on a Node.js/Express + MySQL backend.
- Integrated lab analyzers (ASTM) so instrument results flow straight into patient files; built backend APIs and dashboards used by 20+ laboratories.
- Designed reception, results, work-table, permissions, billing and reporting workflows in Arabic, English and Turkish.
- Built and redesigned the Proitx company website across three versions.

Vue 2, Vuetify, Electron, Node.js, Express, Sequelize, MySQL, Figma

Full Stack Developer · Evntoo — KSA & Egypt Apr 2022 – Jan 2023

- Built e-learning and reservation platforms end to end: frontend interfaces and backend APIs.
- Restructured under-performing platforms into maintainable, efficient systems, working closely with backend and database teams.

Laravel, PHP, Angular, JavaScript, MySQL

Full Stack Developer · Yes-Soft — Germany · remote May 2019 – Aug 2020

- Built custom full-stack solutions with WordPress, PHP and backend integrations; improved deployment pipelines and database-driven workflows.

PHP, WordPress, MySQL, JavaScript

SELECTED PROJECTS

Marhaba Syria — Classifieds marketplace platform (in development): Next.js 15 + PostgreSQL with row-level security, BullMQ jobs, Typesense search, OTP sign-in, admin MFA and moderation; 3 apps, 10 packages, 137 migrations.

Builderization — My studio's bilingual EN/AR site (TanStack Start, React 19, Tailwind) with an SVG illustration system, a lead API and push-to-deploy via GitLab CI to a VPS I run. builderization.com

Ahaloop — Agentic short-video pipeline: Claude Code skills, a review gate on every asset and a novelty gate; FastAPI gateway on a VPS publishing to YouTube, TikTok, Instagram and Facebook.

AI email support agent — FastAPI service for a Shopify brand: IMAP inbox, RAG over store documents (ChromaDB), Shopify lookups and OpenAI-drafted replies; Docker + GitLab CI.

Portfolio platform — Astro static site on GitHub Pages fed by a self-hosted FastAPI + SQLite CMS with WebP media pipeline, admin panel, backups and CI rebuilds. ahmadbayrakdar.github.io
