

Ahmad Bayrakdar

Full Stack Software Engineer (React / Node.js / Scalable Systems)

Email: ahmad.berkdar.sy@gmail.com | Phone: +201080857997

Professional Summary

Full Stack Software Engineer with 7+ years of experience building scalable web applications and production-ready systems across SaaS, healthcare, automation, and AI-driven platforms. Strong expertise in React, Node.js, TypeScript, and database-driven backend architectures. Skilled in designing full-stack systems from concept to deployment, collaborating with cross-functional teams, and delivering high-impact, production-ready applications in international markets (USA, Germany, UAE, KSA). Comfortable working in fully remote, fast-paced environments with strong ownership and end-to-end development capabilities.

Technical Skills

Frontend: React.js, Vue.js, Angular, HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive & component-driven architecture

Backend: Node.js, Express.js, NestJS, REST & GraphQL API design, ORM integration (Prisma, Sequelize), Authentication & role-based access control, Python (Django), PHP, Scalable service architecture

Database: PostgreSQL, MySQL, MongoDB, Relational and NoSQL schema design, Query optimization and indexing strategies

DevOps & Tools: Git & GitHub, CI/CD pipelines (GitHub Actions, Jenkins), Cloud deployment (AWS, DigitalOcean, Vercel), Docker and containerized application deployment

AI & Automation: OpenAI API, Gemini API, DeepSeek, Python automation (NumPy, CSV processing), AI-assisted business workflow automation

Professional Experience

Full Stack Software Engineer

Shrubhub | Remote (USA) | Oct 2023 – Present

- Designed, developed, and maintained full-stack applications supporting ~\$50M in total business revenue.
- Built responsive frontend interfaces with React and scalable backend services using Node.js and REST APIs.
- Integrated AI-powered automation systems (voice-based AI call automation, automated email systems with OpenAI and Gmail API).
- Collaborated with product managers and engineers to deliver production-ready features.
- Optimized performance, scalability, and reliability of full-stack systems.

Projects include: shrubhub.com, monetizetalks.com, monetizerengine.com, justiceguys.com.

Full Stack Engineer & Product Architect

Proitx | UAE | Sep 2020 – Sep 2023

- Led full-stack architecture and UX redesign for SmartLab Medical CMS.
- Developed Vue.js frontend integrated with backend services and medical devices.
- Designed scalable backend APIs and dashboards supporting 20+ laboratories.
- Enhanced adoption, usability, and commercial value of the platform.

Full Stack Developer

Evntoo | KSA & Egypt | Apr 2022 – Jan 2023

- Built full-stack e-learning and reservation platforms, implementing frontend interfaces and backend APIs.
- Transformed low-performing platforms into structured, maintainable, and efficient systems.
- Collaborated closely with backend and database teams for integrated application performance.

Full Stack Developer

Yes-Soft | Germany | May 2019 – Aug 2020

- Developed custom full-stack solutions with WordPress, PHP, and backend logic integration.
- Improved deployment pipelines and database-driven system workflows.

Selected Technical Projects

AI Image Metadata Automation System

- Built scalable full-stack AI application to process ~10,000 stock images.
- Designed backend pipelines with API integrations for automated metadata generation.
- Streamlined data processing for direct upload to stock platforms, reducing workload from weeks to hours.

SmartLab Medical CMS Rebuild

- Led full-stack redesign of platform architecture.
- Rebuilt frontend with Vue.js and developed backend services for medical data integration.
- Increased system scalability, usability, and commercial adoption.

Retail Sales Automation System

- Automated full-stack reporting system using Python and CSV pipelines.
- Replaced manual Excel workflows, delivering faster and more reliable reporting.

Education

Bachelor of Science in Computer Engineering

International University for Science and Technology – Damascus

2015 – 2021

Graduated with top grades in programming-related coursework
